Why should I consider an Information Security & Data Privacy Policy?

Your Professional Liability Policy may be limited in the coverage that it provides. The intent of a Professional Liability policy is to provide coverage for errors & omissions in the delivery of professional services. Most often a loss of data is not related to professional services, and many policies may limit or exclude coverage.

Your Professional Liability Policy provides limited, if any, first party coverage. All but a few states have Security Breach Notification Laws in the event of a breach of personal data. The estimated First Party Costs to you should you experience a data breach range from \$5 to \$50 per client. Visit our website for a specific summary of your State Notification Laws.

What does an Information Security & Data Privacy Policy cover?

- Unauthorized access, theft, or loss of personally identifiable information
- Legal Liability from failure to comply with state breach notice laws
- Privacy Notification and Credit Monitoring costs
- Regulatory defense and penalties
- Website Content Media Liability
